ii)	Explain how expert system is used for low back pain diagnosis.	8	CO6	U
iii)	Using the Hebb rule, find the weights required to perform the following classifications of the given input patterns "A" and "E". The pattern is shown as 3x3 matrix form in the squares. The "+" symbols represent the value "1" and the empty squares indicate "-1". Consider "A" belongs to the members of class (so has target value 1) and "E" does not belong to the members of class (so has target value -1).	8	CO2	Ap
