VIDYAVIHAR UNIVERSITY

Semester: January 2022		
Examination: ESE Examination		
Programme code:02/03/04	Class:	Semester: I
Programme: BAF/BAF Hons/BFM	FYBFM	
Name of the Constituent College:		Name of the
S K Somaiya College		department/Section/Center:
		Commerce and Business Studies
Course Code:	Name of the Course: Quantitative Methods	
Duration: 2 hours	Maximum Marks: 60	
Instructions: 1) All questions are compulsory. 2) Figures to the right indicate full marks		

Question No.		Max. Marks																						
Q1 (a)	<p>Multiple choice Question:</p> <p>1) Any periodical payment of a fixed amount made at a regular interval is</p> <table><tr><td>i) Installment</td><td>iii) Future Value</td></tr><tr><td>ii) Annuity</td><td>iv) Fee</td></tr></table> <p>2) If the mean of frequency distribution is 100 & the coefficient of variation is 35% then what is the value of the variance?</p> <table><tr><td>i) 35</td><td>iii) 1225</td></tr><tr><td>ii) 0.35</td><td>iv) 350</td></tr><tr><td>iii)</td><td></td></tr></table> <p>3) Consider the following data 2,7,7,9,10,12,15,17,20,22. Which of the following is median of the data.</p> <table><tr><td>i) 10</td><td>iii) 12</td></tr><tr><td>ii) 7</td><td>iv) 11</td></tr></table> <p>4) In a Binomial distribution the mean is 15 & variance is 10 then parameter n is</p> <table><tr><td>i) 28</td><td>iii) 16</td></tr><tr><td>ii) 45</td><td>iv) 25</td></tr></table> <p>5) Which of the following is variance of discrete uniform distribution?</p> <table><tr><td>i) $(n+1)/2$</td><td>iii) $(n^2 - 1)/12$</td></tr><tr><td>ii) $(n^2 + 1)/12$</td><td>iv) $(n-1)/6$</td></tr></table>	i) Installment	iii) Future Value	ii) Annuity	iv) Fee	i) 35	iii) 1225	ii) 0.35	iv) 350	iii)		i) 10	iii) 12	ii) 7	iv) 11	i) 28	iii) 16	ii) 45	iv) 25	i) $(n+1)/2$	iii) $(n^2 - 1)/12$	ii) $(n^2 + 1)/12$	iv) $(n-1)/6$	[05 M]
i) Installment	iii) Future Value																							
ii) Annuity	iv) Fee																							
i) 35	iii) 1225																							
ii) 0.35	iv) 350																							
iii)																								
i) 10	iii) 12																							
ii) 7	iv) 11																							
i) 28	iii) 16																							
ii) 45	iv) 25																							
i) $(n+1)/2$	iii) $(n^2 - 1)/12$																							
ii) $(n^2 + 1)/12$	iv) $(n-1)/6$																							
Q1 (b)	<p>Define the following Terms:</p> <p>1) Effective annual Rate.</p> <p>2) Median for the continuous frequency distribution</p> <p>3) Lognormal Distribution.</p> <p>4) Conditional probability.</p> <p>5) Geometric mean.</p>	[05 M]																						

Q1 (c)	<p>Fill in the Blanks:</p> <p>1. The class interval having cumulative frequency a least greater than or equal to $N/2$ is known as</p> <p>2. If the frequency is divided into ten parts, then each part is called ...</p> <p>3. Each subset of a sample space is called as ...</p> <p>4. The formula for correlation coefficient =</p> <p>5. A sequence of periodic payments regularly over a specified period of time is known as ...</p>	[05 M]												
Q2 (a)	<p>1) A bag contains 4 white & 7 black balls. Find the expectation of a person who is allowed to draw 2 balls from the bag & who is to receive 02 Rs. for each black ball & 02 Rs. For each white ball. [07 M]</p> <p>2) Two independent variables x & y have mean 5 & 10 with variance 3 & 11 respectively obtain correlation coefficient between u & v [08 M] Where; $u = 3x+y$ & $v = 3x-y$</p> <p style="text-align: center;"><u>OR</u></p> <p>1) A die is thrown twice. Let A be the event, first die shows 5 & B be the event second die shows 5. Find $P(A \cup B)$. [07 M]</p> <p>2) Rupees 5000 is invested in a term deposit scheme that fetches interest 6% per annum compounded quarterly. What will be the interest after one year? [06 M] What is effective rate of interest?</p> <p>3) State PDF & Variance of Binomial Distribution. [02 M]</p>													
Q3 (a)	<p>1) The length of similar components produced by a company are approximated by a normal distribution model with a mean of 5cm & standard deviation of 0.02cm. If component is chosen of random. [06 M]</p> <p>i) What is probability that the length of this component is between 4.98 & 5.02 cm? $P(0 < Z < 1) = 0.3413$</p> <p>ii) What is the probability that the length of this component is between 4.96 & 5.04 cm? $P(0 < Z < 2) = 0.4772$</p> <p>2) Calculate A.M. & median of following distribution of 100 Person by age. [07 M]</p> <table><tr><td>Age Last Birthday</td><td>15-19</td><td>20-24</td><td>24-29</td><td>30-34</td><td>35-39</td></tr><tr><td>Number</td><td>4</td><td>20</td><td>38</td><td>24</td><td>10</td></tr></table> <p>3) Give 02 real life situations of binomial distribution. [02 M]</p> <p style="text-align: center;"><u>OR</u></p> <p>1) Derive mean & variance of binomial distribution. [08 M]</p>	Age Last Birthday	15-19	20-24	24-29	30-34	35-39	Number	4	20	38	24	10	
Age Last Birthday	15-19	20-24	24-29	30-34	35-39									
Number	4	20	38	24	10

2) A husband & wife appears in an interview for two vacancies in some post. The probability of husband's selection is $\frac{1}{5}$ & that of wife selection is $\frac{1}{7}$. What is the probability that.

- Both of them will be selected.
- Only one of them will be selected.

[07 M]

Q4 (a)

1) Calculate mean deviation about median for the following data.

No of trees planted	5-25	25-45	45-65	65-85	85-105
No of schools (P)	12	8	14	20	6

2) If X is Binomially distributed with 6 trials & a probability of success equal to $\frac{1}{4}$ at each attempt, what is the probability of exactly 04 successes? Also find probability of at least 04 successes?

[08 M]

[07 M]

OR

1) Find mode & median of the following data.

Marks	0-10	10-20	20-30	30-40	40-50
No of students	8	15	22	18	7

2) Two dice are thrown simultaneously & sum of the numbers obtained is found to be 7. What is the probability that the number 3 has appeared at least once?

[06 M]

[07 M]

3) Define the term opportunity cost. Give one real life example

[02 M]
