

K. J. Somaiya Institute of Technology, Sion, Mumbai-22
(Autonomous College Affiliated to University of Mumbai)

Nov-Dec 2025-26		
Program: B.Tech		Scheme : III
Examination: TY Semester: V		
Course Code: AIC502 and	Course Name: Data Warehousing, Mining & Visualization	
Date of Exam: 26/11/2025	Duration: 2.5 Hours	Max. Marks: 60

Instructions: (1)All questions are compulsory. (2)Draw neat diagrams wherever applicable. (3)Assume suitable data, if necessary.																						
Q. No.	Question	Max. Marks	CO	BT level																		
Q 1	Solve any two questions out of three: (05 marks each)	10																				
a)	What are the different characteristics of unstructured data?		CO1	U																		
b)	Compare: D3.js and Google Charts		CO6	U																		
c)	Explain in brief box plot with suitable diagram. Construct a box plot for the following data: 12, 5, 22, 30, 7, 36, 14, 42, 15, 53, 25		CO3	Ap																		
2	Solve any two questions out of three: (05 marks each)	10																				
a)	Define data warehouse. Explain in detail the definition components of data warehouse.		CO2	U																		
b)	Draw Apriori algorithm flowchart and explain it.		CO4	U																		
c)	Explain in detail acquiring and visualizing data steps.		CO5	U																		
Q.3	Solve any two questions out of three. (10 marks each)	20																				
a)	Construct FP tree with minimum support 3 and write frequent patterns generated. <table><tr><td>TID</td><td>Items bought</td><td>Ordered frequent Items</td></tr><tr><td>100</td><td>{f, c, a, d, g, i, m, p}</td><td>{f, c, a, m, p}</td></tr><tr><td>200</td><td>{a, b, c, f, l, m, o}</td><td>{ f, c, a, b, m}</td></tr><tr><td>300</td><td>{b, f, h, j, o, w}</td><td>{f, b }</td></tr><tr><td>400</td><td>{b, c, k, s, p}</td><td>{c, b, p }</td></tr><tr><td>500</td><td>{a, f, c, e, l, p, m, n}</td><td>{f, c, a, m, p}</td></tr></table>		TID	Items bought	Ordered frequent Items	100	{f, c, a, d, g, i, m, p}	{f, c, a, m, p}	200	{a, b, c, f, l, m, o}	{ f, c, a, b, m}	300	{b, f, h, j, o, w}	{f, b }	400	{b, c, k, s, p}	{c, b, p }	500	{a, f, c, e, l, p, m, n}	{f, c, a, m, p}	CO4	Ap
TID	Items bought		Ordered frequent Items																			
100	{f, c, a, d, g, i, m, p}		{f, c, a, m, p}																			
200	{a, b, c, f, l, m, o}		{ f, c, a, b, m}																			
300	{b, f, h, j, o, w}	{f, b }																				
400	{b, c, k, s, p}	{c, b, p }																				
500	{a, f, c, e, l, p, m, n}	{f, c, a, m, p}																				
b)	Explain in detail text data visualization. Justify with the Examples	CO5	U																			
c)	Describe the Knowledge Discovery in Databases (KDD) process. What are the key stages involved, and why is each stage important in	CO3	U																			

	data mining?																																																									
Q.4	Solve any two questions out of three. (10 marks each)	20																																																								
a)	Justify the need of Strategic information. Compare: Operational vs Decision Support Systems		CO1	An																																																						
b)	The sugar_sales_data table contains multidimensional data for analyzing sugar product sales (SalesAmount in lakhs) across different years (2023, 2024), quarters, months, product categories (Raw Sugar, Refined Sugar, Brown Sugar, Jaggery), and regions (4 Indian states). Draw data cube for the given Data. Perform OLAP operations for below mentioned queries using SQL. Identify which OLAP operation is performed for the respective query? Draw all OLAP operation diagrams. <table><tr><th>Year</th><th>Quarter</th><th>Month</th><th>ProductCategory</th><th>Region</th><th>SalesAmount</th></tr><tr><td>2023</td><td>Q1</td><td>January</td><td>Raw Sugar</td><td>Maharashtra</td><td>2200</td></tr><tr><td>2023</td><td>Q2</td><td>April</td><td>Refined Sugar</td><td>Uttar Pradesh</td><td>2600</td></tr><tr><td>2023</td><td>Q3</td><td>July</td><td>Brown Sugar</td><td>Karnataka</td><td>2100</td></tr><tr><td>2023</td><td>Q4</td><td>October</td><td>Jaggery</td><td>Tamil Nadu</td><td>1900</td></tr><tr><td>2024</td><td>Q1</td><td>February</td><td>Refined Sugar</td><td>Maharashtra</td><td>2800</td></tr><tr><td>2024</td><td>Q2</td><td>May</td><td>Raw Sugar</td><td>Uttar Pradesh</td><td>2500</td></tr><tr><td>2024</td><td>Q3</td><td>August</td><td>Jaggery</td><td>Karnataka</td><td>2300</td></tr><tr><td>2024</td><td>Q4</td><td>November</td><td>Brown Sugar</td><td>Tamil Nadu</td><td>2000</td></tr></table> Answer the following queries. 1. What is the total sales amount for each year? 2. What are the total quarterly sales figures for Maharashtra in 2024? 3. Show the sales of all sugar types in the second quarter (Q2) across all regions. 4. Show sales data for Raw Sugar and Jaggery during the first two quarters of 2023 in Karnataka and Uttar Pradesh. 5. Display a table showing sales amounts by product category.	Year	Quarter	Month	ProductCategory	Region	SalesAmount	2023	Q1	January	Raw Sugar	Maharashtra	2200	2023	Q2	April	Refined Sugar	Uttar Pradesh	2600	2023	Q3	July	Brown Sugar	Karnataka	2100	2023	Q4	October	Jaggery	Tamil Nadu	1900	2024	Q1	February	Refined Sugar	Maharashtra	2800	2024	Q2	May	Raw Sugar	Uttar Pradesh	2500	2024	Q3	August	Jaggery	Karnataka	2300	2024	Q4	November	Brown Sugar	Tamil Nadu	2000		CO2	Ap
Year	Quarter	Month	ProductCategory	Region	SalesAmount																																																					
2023	Q1	January	Raw Sugar	Maharashtra	2200																																																					
2023	Q2	April	Refined Sugar	Uttar Pradesh	2600																																																					
2023	Q3	July	Brown Sugar	Karnataka	2100																																																					
2023	Q4	October	Jaggery	Tamil Nadu	1900																																																					
2024	Q1	February	Refined Sugar	Maharashtra	2800																																																					
2024	Q2	May	Raw Sugar	Uttar Pradesh	2500																																																					
2024	Q3	August	Jaggery	Karnataka	2300																																																					
2024	Q4	November	Brown Sugar	Tamil Nadu	2000																																																					
c)	Develop a simple transaction manager that enables users to add financial transactions by entering a description and amount. The application should update the total balance dynamically based on the transactions, distinguishing between income (positive values) and expenses (negative values). Additionally, the transactions should be categorized and displayed in a list format, with income shown in green and expenses in red for better clarity.		CO6	Ap
